

HOW MUCH TO FEED YOUR PUPPY DAILY

Do you know the expected adult weight of you puppy?

YES

Feed

**3% of the expected
adult bodyweight**

NO

This is based on the bodyweight of your puppy at a particular age:

2 – 4 months 10 – 8% of bodyweight
(at 4 months old drop down to 2 meals a day)
4 – 6 months 8 – 6% of bodyweight
6 – 8 months 6 – 4% of bodyweight
8 – 12 months 4 – 3% of bodyweight

This should be used as a guide. Keep an eye on your puppy and adjust up or down as needed.
